LearnLive Technologies Continues Strong Growth in 2009

Provider of platform that automates eLearning for professionals sees client list grow 19%; deployed at 65% of Top 30 accounting firms; 20% of the AM Law 100 Firms

Seattle, WA — January 25, 2009 — [LearnLive Technologies](#), the leading platform provider for the automation, delivery, management, and certification of accredited eLearning programs for professional service firms including [accounting](#), [legal](#) and finance, saw continued strong growth in 2009 with deployment of its software now at 65% of the top 30 accounting firms and 20% of the [AM 100 Law](#) firms, the company announced today. The company also saw increased traction in banking and finance industries.

“LearnLive provides a single integrated platform that meets our content management, delivery, and tracking needs, requiring less overhead and maintenance from both a financial and resources perspective. I waste less time because I’m not trying to juggle data from multiple sources, and I can confidently configure the platform, knowing that everything is linked behind the scenes,” said Chris Gardephe, Director of Professional Development Proskauer Rose LLP.

LearnLive Technologies (www.learnlive.com), which meets all prescribed guidelines required by state and national boards for the certification of web-based delivery of professional education, drastically lowers costs by eliminating manual administration, excessive travel, redundant efforts due to schedule conflicts, and the need for managing disconnected internal and external systems and vendors.

With LearnLive companies can manage a full suite of education products – internal and external, formal, informal, self-study, live or on-demand, and a blend – to provide seamless and truly effective learning that builds organizational competencies while assuring professional license requirements are being met.

For professionals LearnLive offers a rich and interactive environment, with personalized dashboards for managing coursework, matriculation, accreditation history and requirements wrapped within company-branded “University” portals.

“Beyond the tremendous cost advantages that our products deliver, LearnLive creates a pathway for professional service companies to streamline and standardize training and development, while moving beyond logistics to the continued and expeditious development of highly-qualified professionals. These “learning cultures” are a notable competitive advantage for companies in the areas of legal, accounting and banking/finance that require heavy professional training, accreditation and compliance,” said Shawn Englund, LearnLive CEO.

[LearnLive](#) manages real-time learning management, administration, registration and cataloging, including the delivery of client-specific content that meets requirements for continuing professional education such as live and on-demand webcasts, state-to-state compliance, accreditation and certification, course authoring, archiving and more. The LearnLive platform includes [Compass](#)[™], an integrated learning management system (LMS), [Compliance Tracking](#)[™], an automated compliance manager, [Connect](#)[™], a webcast delivery platform, and [Capture](#)[™], a course authoring tool.

Additional company highlights in 2009 include:

- Doubled the number of course credits issued via LearnLive live and on-demand class work
- Tripled the number of webcast minutes delivered
- Listed for second year in row as one of the [Inc. 500](#) fastest growing companies
- Listed for the second year in a row as one of the *Puget Sound Business Journal's* [fastest growing private companies in Washington](#)

- Released major product introductions and platform upgrades in March
